## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-9 and 12-18 are allowed. The following is an examiner's statement of reasons for allowance: Isshiki teaches using mucosal grafts to treat laryngeal web, Landsberg et al. teaches repair of mucogingival defects in maxillary molars using autografts containing submucosa. Badylak (U.S. 5,275,826) teaches tissue grafts of fluidized intestinal submucosa. Badylak also teaches grafts made of vertebrate basement membrane. The prior art of record fails to teach or make obvious a method for repair or replacement of damaged or diseased **head or neck soft tissues** including the steps of removing a damaged or diseased portion, and replacing the removed portion with an acellular graft construct comprised of **vertebrate submucosa or intact basement membrane**. Although prior art of record including Badylak speaks of the advantage of submucosal grafts used to graft tendons and ligaments, their use as grafts in head and neck soft tissue replacement and repair cannot be considered obvious outside of reading the Applicant's specification which would be a case of impermissible hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
